### **Cummins Valvoline Endorsement Letter**

This letter is intended to confirm that Cummins endorses Valvoline Premium Blue™ engine oils for its full range of diesel and gas engines and applies to the Greater Europe countries mentioned in the Statement of Work between Cummins Greater Europe and Valvoline Europe.

Cummins Inc. has established a number of Cummins® Engineering Standards (CES) which describe the performance levels of engine oils that must be used in various engines. In addition, Cummins Inc. works through the Engine Manufacturers Association (EMA) and with the many technical and marketing organisations responsible for lubricant quality around the world, to develop industry specifications that meet Cummins Inc. requirements. Cummins Inc. recommends the use of a high quality, diesel engine oil, including Valvoline Premium Blue™.

The advanced technology of the Premium Blue portfolio, jointly developed by Cummins and Valvoline, contains a proprietary combination of additives designed specifically to meet the needs and performance levels of today's advanced engines. In addition, Valvoline Premium Blue™ is widely used as first fill on Cummins factory assembly lines around the globe. Therefore Valvoline Premium Blue™ engine oil is endorsed by Cummins.
